ADDRESS.

IN commencing a new book on Butterflies, I have thought it necessary to enter into some explanation as to my connexion with Doubleday, Westwood, and Hewitson's *Diurnal Lepidoptera*.

The proprietors of that work have been accused of a breach of faith towards their subscribers, a plea, and I think a very shabby one, to afford them an excuse to discontinue it.

But for the guarantee of their names in the list of subscribers the book would never have been begun.

At Mr. Doubleday's death the publishers were of course absolved from their engagement; they might have abandoned the work in its unfinished state—almost worthless. To continue it was to entail upon themselves certain loss. It was necessary to supply Mr. Doubleday's place by securing the services of our ablest entomologist, to pay for the completion of a large amount of letterpress which Mr. Doubleday had left in arrear, and to furnish to the subscribers double the quantity at first promised. This has been done. I have done my best, besides, to make the one plate of recent parts as valuable as the two of former numbers.

Who then are the aggrieved parties; the subscribers who have withdrawn their support from their friend's book, or the publishers who at their own loss, and for no other reason but to benefit the subscribers, have continued a valuable book to its completion?

I write not as an interested party (in a pecuniary sense, I can neither gain nor lose), but as a lover of fair play.

My part in the work was taken purely *con amore*: my drawings have been supplied free of cost, and I trust that the same admiration for the beautiful objects which I have had to illustrate, which made my share in the "*Genera of Diurnal Lepidoptera*" a labour of love, will continue unabated during the progress of the present work, cheered by the approbation of those whose praise it is my wish to merit.

The book of "*Exotic Butterflies*" can never be perfect, neither can it be said to be imperfect whenever it may be brought to a close.

Multitudes of new butterflies fill our cabinets; and whilst we have men abroad filled with the ardour of Mr. Bates, the eyes of entomologists will be gladdened by the sight of many more; and so long as it shall be God's will to continue to me health with that deep heartfelt love for His glorious works, which has been the blessing of my life, my pencil shall be employed to pourtray them.

WILLIAM C. HEWITSON.

DIRECTIONS FOR THE BINDER.

To arrange the work by the Systematic Index, which may be done either by the heading of the Plate, or the number at the beginning of the Letterpress.

The Plates to open to the left side, as in the Quarterly Parts.

The Indices to come at the end of the Book.

PART XXI. will be published on the FIRST of JANUARY, 1857.

EXOTIC BUTTERFLIES,

WILLIAM C. HEWITSON,

AUTHOR OF

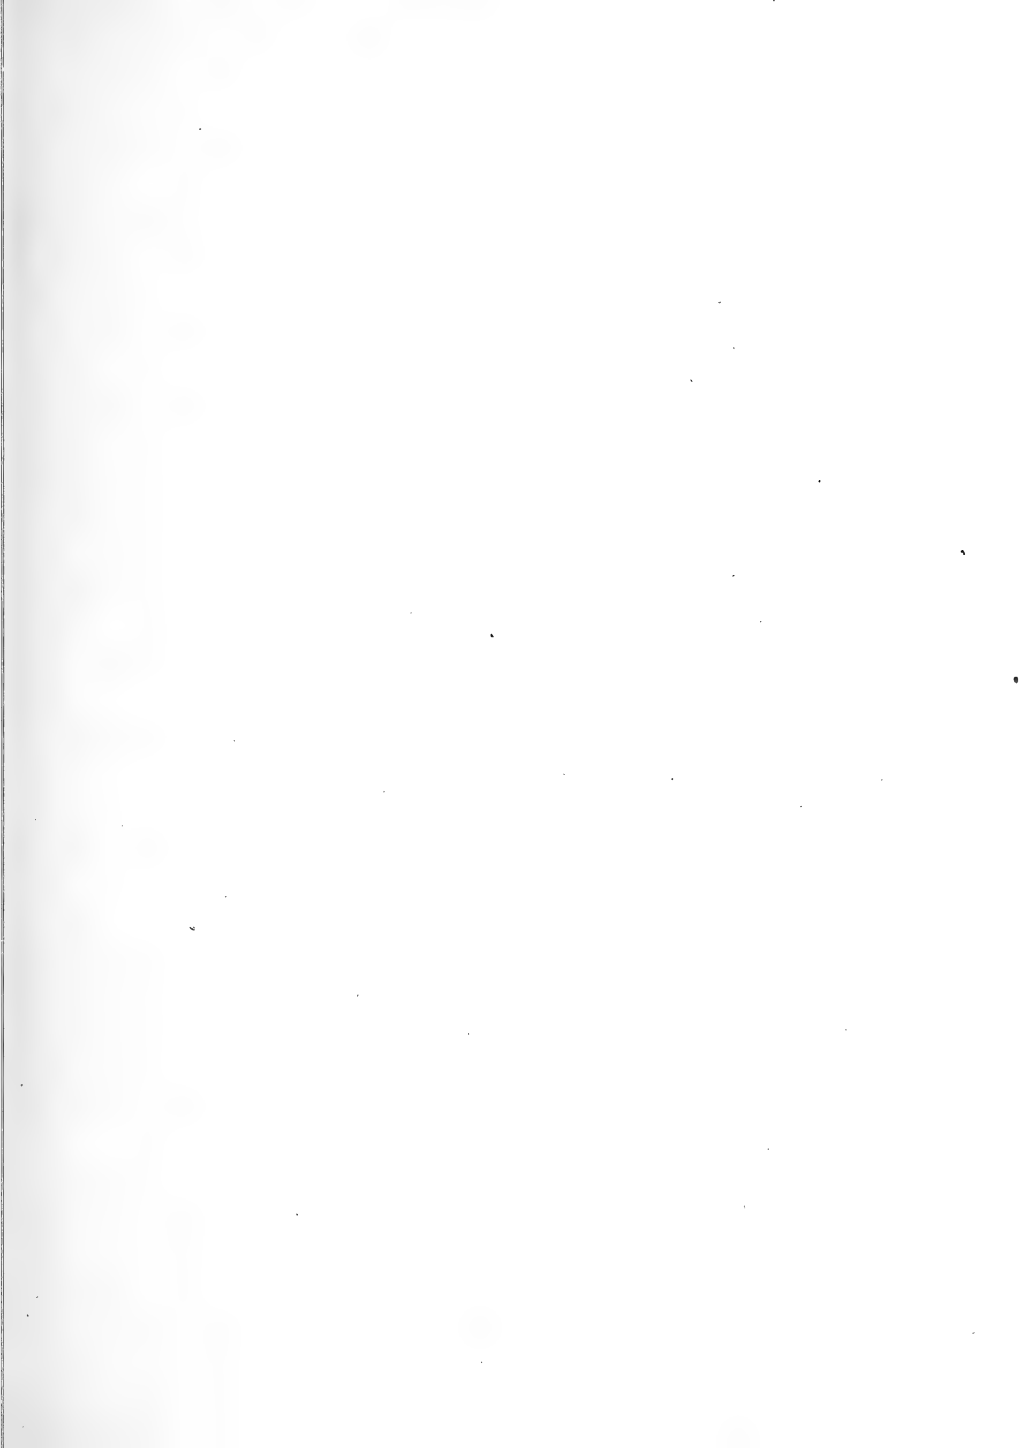

"ILLUSTRATIONS OF THE EGGS OF BRITISH BIRDS."

JOHN VAN VOORST, 1, PATERNOSTER ROW.

Ex. 1. 1.

Stornia XX. Habitus III.

"Mr. Hewitson's beautiful work on Exotic Butterflies is continued with regularity. Four numbers have appeared during the year. In this work there is a truthfulness of outline, an exquisite delicacy of pencilling, a brilliancy and transparency of colouring that has rarely been equalled and probably never surpassed."

The President in his Address to the Entomological Society, 1856.

"These illustrations are elegant and true to nature."

Dr. Gerstaecker, Bericht über Entomologie, 1854.

"Mr. Hewitson's beautiful work on Exotic Butterflies is continued with regularity. Four numbers have appeared during the year. In this work there is a truthfulness of outline, an exquisite delicacy of pencilling, a brilliancy and transparency of colouring that has rarely been equalled and probably never surpassed."

The President in his Address to the Entomological Society, 1856.

"These illustrations are elegant and true to nature."

Dr. Gerstaecker, Bericht über Entomologie, 1854

"Mr. Hewitson's 'Exotic Butterflies' has been continued in five new parts, remarkable, like the former, for fidelity of illustration and sterling quality of text.

"It deserves praise as being particularly judicious, that the author presents side by side a great number of closely allied species from difficult genera, as in this case for instance he does with the genera *Ithomia* and *Catagramma*."

Dr. Gerstaecker, Bericht über Entomologie, 1855.

A CATALOGUE OF LYCÆNIDÆ.

BY W. C. HEWITSON.

With Eight Coloured Plates illustrating the Genera Ogyris and Amblypodia.

PRICE 21s.

PUBLISHED BY THE TRUSTEES OF THE BRITISH MUSEUM.

Shortly will be Published,

DIURNAL LEPIDOPTERA.

BY W. C. HEWITSON.

WITH COLOURED ILLUSTRATIONS BY THE AUTHOR.

PART I.—LYCÆNIDÆ.

THIS new work will be published in parts, whenever 10 or 12 plates are ready. It will not be confined to any particular groupe. The trustees of the British Museum having declined to proceed with the Catalogue of Lycænidæ, the first part of the new work, though not a continuation of the Catalogue, will commence with the Lycænidæ, where the Catalogue leaves off.

Ce nouvel ouvrage sera publié par livraisons aussitôt que dix à douze planches seront achevées. Il ne sera pas limité à un seul groupe. Les Gardiens du Musée Britannique n'ayant pas jugé convenable de continuer les Lycænidæ, la première livraison du nouvel ouvrage partira du point où ils se sont arrêtés. Ce n'en sera pas une continuation, mais un travail désiré par les hommes à qui cet ouvrage est acceptable.

Chlorocoma IX.

On

Chlorocoma IX.

THE first object of the Author's ambition has been to win the approval, by his Works, of contemporary entomologists. He has, therefore, peculiar pleasure in quoting the following unsolicited opinions :—

“ Mr. Hewitson's beautiful work on Exotic Butterflies is continued with regularity ; four Numbers have appeared during the year. In this work there is a truthfulness of outline, an exquisite delicacy of pencilling, a brilliancy and transparency of colouring, that has rarely been equalled, and probably never surpassed.”—EDWARD NEWMAN, *President of the Entomological Society of London.*

“ M. Hewitson, aussi habile dessinateur que savant lépidoptérologue, porte un nom qui restera dans la science. Grand amateur et possesseur d'une des plus riches collections du monde en papillons diurnes, il a débuté dans la carrière entomologique comme collaborateur d'Edward Doubleday (*Diurnal Lepidoptera*, 2 volumes in folio). Il en a lui-même exécuté toutes les figures. Ce talent si apprécié de M. Hewitson ne devait par s'arrêter là. En 1856 il a entrepris, sous le titre de ‘ Exotic Butterflies,’ la publication in quarto d'un splendide ouvrage dont trois volumes sont complètement terminés et le quatrième en bon voie. Ce magnifique travail, qui forme un supplément indispensable aux illustrations de Cramer, de Drury, de Hubner et à toutes les iconographies modernes, ne sera jamais surpassé sous le rapport de l'exactitude rigoureuse du dessin et de la vérité de coloris.”—BOISDUVAL, *Lépidoptères de la Californie.*

“ Der dritte band von W. Hewitson's “ Exotic Butterflies ” bringt abermals einen grossen Reichthum an neuen und ausgezeichneten Arten, deren zahl sich auf 199 beläuft, in abbildungen, welche bis jatzt an Eleganz und Naturtreue unübertroffen dastehen, zur Kenntniss. Die tafeln gewähren in Anordnung und Colorit einen gleich angenehmen Eindruck ; sie sind weder überfüllt noch unharmonisch und lassen in beider Beziehung einen künstlerischen Geschmack erkennen.”—GERSTAECKER, *Bericht.*

The want of a Title Page and Index to the Fourth Volume has been found so inconvenient by the booksellers that they are now given. The Index includes the contents of Parts 61 to 80. Subsequent parts, 81, 82, and 83, will go with Vol. V.

Les Libraires ayant trouvé bien incommode le manque au quatrième Tome d'un Titre et d'une Table des Matières, on les donne maintenant. La Table des Matières comprend le contenu des Livraisons 61—80. On ajoutera au cinquième Tome les Livraisons suivantes 81, 82 et 83.

WITH COLOURED DRAWINGS AND DESCRIPTIONS.

BY

WILLIAM C. HEWITSON.

JOHN VAN VOORST, 1, PATERNOSTER ROW.

*Copy to the
British Museum*

THE first object of the Author's ambition has been to win the approval, by his Works, of contemporary entomologists. He has, therefore, peculiar pleasure in quoting the following unsolicited opinions :—

“ Mr. Hewitson's beautiful work on Exotic Butterflies is continued with regularity ; four Numbers have appeared during the year. In this work there is a truthfulness of outline, an exquisite delicacy of pencilling, a brilliancy and transparency of colouring, that has rarely been equalled, and probably never surpassed.”—EDWARD NEWMAN, *President of the Entomological Society of London*, 1856.

“ M. Hewitson, aussi habile dessinateur que savant lépidoptérologue, porte un nom qui restera dans la science. Grand amateur et possesseur d'une des plus riches collections du monde en papillons diurnes, il a débuté dans la carrière entomologique comme collaborateur d'Edward Doubleday (*Diurnal Lepidoptera*, 2 volumes in folio). Il en a lui-même exécuté toutes les figures. Ce talent si apprécié de M. Hewitson ne devait par s'arrêter là. En 1856 il a entrepris, sous le titre de ‘ Exotic Butterflies,’ la publication in quarto d'un splendide ouvrage dont trois volumes sont complètement terminés et le quatrième en bon voie. Ce magnifique travail, qui forme un supplément indispensable aux illustrations de Cramer, de Drury, de Hubner et à toutes les iconographies modernes, ne sera jamais surpassé sous le rapport de l'exactitude rigoureuse du dessin et de la vérité de coloris.”—BOISDUVAL, *Lépidoptères de la Californie*.

“ Der dritte Band von W. Hewitson's “ Exotic Butterflies ” bringt abermals einen grossen Reichthum an neuen und ausgezeichneten Arten, deren zahl sich auf 199 beläuft, in abbildungen, welche bis jetzt an Eleganz und Naturtreue unübertroffen dastehen, zur Kenntniss. Die Tafeln gewähren in Anordnung und Colorit einen gleich angenehmen Eindruck ; sie sind weder überfüllt noch unharmonisch und lassen in beider Beziehung einen künstlerischen Geschmack erkennen.”—GERSTAECKER, *Bericht*.

“ Mr. Hewitson's beautiful illustrations of Butterflies have regularly appeared throughout the last two years, and fully maintain their high reputation for delicacy of execution and superb colouring. Long may he live to continue them ! till they form a monument of his patient skill and enthusiastic love of nature, unequalled by the work of a single individual in any age or country.”—A. R. WALLACE, *President of the Entomological Society of London*, 1871.
